

Installation, Inspection & Repair of the Avanti Safety Rail System

The Installation, Inspection & Repair of the Avanti Safety Rail System course educates the participants on how to safely conduct a correct installation and repair of the Avanti Safety Rail System. Furthermore, the participants will learn how to perform the 12th month competent inspection in accordance to the Directive for Personal Protective Equipment.

Avanti E-Learning courses can be accessed anywhere at any time and can be used directly on computer, laptop or tablet. Learn at your own pace and obtain your certificate and authorization immediately upon successful completion.

With this new course you will experience improved graphics, more user friendly interactivity and the inclusion of a Avanti virtual trainer guiding and instructing the participant through the e-learning with text-to-speech options.
